Estimated time to complete this lab: **20 minutes.**

Create a **".log"** file and a **log folder** in the working directory of Git. Update the **.gitignore** file in such a way that on committing, these files (.log extensions and log folders) are ignored.

Verify if the git status reflects the same about working directory, local repository and git repository.

```
(base) sanjays-MacBook-Air:gitdemo sanjay$ echo "this is a test log file" > test.log
(base) sanjays-MacBook-Air:gitdemo sanjay$ mkdir log
(base) sanjays-MacBook-Air:gitdemo sanjay$ echo "log data" > log/application.log
(base) sanjays-MacBook-Air:gitdemo sanjay$ echo "More log data"> log/error.log
(base) sanjays-MacBook-Air:gitdemo sanjay$ git status
On branch main
Your branch and 'origin/master' have diverged,
and have 2 and 1 different commits each, respectively.
  (use "git pull" to merge the remote branch into yours)

Untracked files:
  (use "git add <file>..." to include in what will be committed)

        log/
        test.log

nothing added to commit but untracked files present (use "git add" to track)
